

Subject: World Cup - Numbers Game.

This world cup is already determined by the numbers....

1. Brazil won the World Cup in 1994; before that they also won in 1970. Adding $1970 + 1994 = 3964$

2. Argentina won its last World Cup in 1986; before that they also won in 1978. Adding $1978 + 1986 = 3964$

3. Germany won its last World Cup in 1990; before that they also won in 1974. Adding $1974 + 1990 = 3964$

4. Brazil also won the World Cup in 2002; before that they also won in 1962. Adding $1962 + 2002 = 3964$

5. Therefore if you want to know what nation is going to win the World Cup in 2010, you only have to subtract 2010 from the magic number that we have determined: $3964 - 2010 = 1954$... In 1954 the World Cup was won by Germany!!!
Probably not scientific.. . but pretty interesting. .

Cheers
